FDA, CDC, ECRI and JOINT COMMISSION – Reference the dangers of Ventilator Disconnections:

- FDA- Safety: The FDA reports that approximately 200 deaths and numerous injuries occur annually due to accidental ventilator disconnections.
- CDC- VAP: CDC states unintentional ventilator disconnections are a cause of VAP – Ventilator Acquired Pneumonia.
- JCAHO-& AHA Commercially Available Device: Joint Commission and AHA recommends that facilities utilize a commercially available device, not improvised devices such as rubberbands or tape.
- ALARMS: ECRI rated Alarm Management as the #1 most hazardous health technology issue in 2012. "We routinely see deaths and injuries associated with 'alarm fatigue' Alarms are unsettling to family members, distracting to staff and become dangerous 'white noise' that can mask a real event!!"

#401

VENT-TIE® Adult Trach Tube Holder with Ventilator Anti-Disconnect Device - 1 Piece

Features & Benefits:

- Provides trach tube security while also securing the ventilator circuitry
- Lifts and supports at the 15 mm site, removing a significant amount of pressure on the distal end of the trach tube – intended to reduce back tracheal wall irritation and initiate cough reflex
- Stabilizes the interface – intended to reduce patient discomfort, movement, and subsequent pulling of the trach, potentially reducing decannulation
- Replaces rubberbands, shoe strings, and other ad hoc securement devices
- **LATEX FREE** - No latex reactions which prevents latex hypersensitivity
- Compatible with close suction, T-pieces elbow connectors, OptiFlow and all trach tubes
- 100% hypoallergenic cotton
- Quick release in case of emergency
- Reimbursement Code A7526

DIMENSIONS

Length: 17" / Width: 1"

ORDERING INFORMATION:

1-800-647-0172 | 610-692-8468 Fax

#401P

PEDI-VENT-TIE® Pediatric Trach Tube Holder with Ventilator Anti-Disconnect Device - 1 Piece

Features & Benefits:

- Provides trach tube security while also securing the ventilator circuitry
- Lifts and supports at the 15 mm site, removing a significant amount of pressure on the distal end of the trach tube – intended to reduce back tracheal wall irritation and initiate cough reflex
- Stabilizes the interface – intended to reduce patient discomfort, movement, and subsequent pulling of the trach, potentially reducing decannulation
- Replaces rubberbands, shoe strings, and other ad hoc securement devices
- **LATEX FREE** - No latex reactions which prevents latex hypersensitivity
- Compatible with close suction, T-pieces elbow connectors, OptiFlow and all trach tubes
- **#401P is made specifically for the Pediatric Patient**
- 100% hypoallergenic cotton
- Quick release in case of emergency
- Reimbursement Code A7526

DIMENSIONS

Length: 11.5" / Width: .75"

ORDERING INFORMATION:

#402

VENT-TIE® Adult Trach Tube Holder with Ventilator Anti-Disconnect Device - 2 Piece

Features & Benefits:

- Provides trach tube security while also securing the ventilator circuitry
- Lifts and supports at the 15 mm site, removing a significant amount of pressure on the distal end of the trach tube – intended to reduce back tracheal wall irritation and initiate cough reflex
- Stabilizes the interface – intended to reduce patient discomfort, movement, and subsequent pulling of the trach, potentially reducing decannulation
- Replaces rubberbands, shoe strings, and other ad hoc securement devices
- **LATEX FREE** - No latex reactions which prevents latex hypersensitivity
- Compatible with close suction, T-pieces elbow connectors, OptiFlow and all trach tubes
- 100% hypoallergenic cotton with elastic stretch piece
- Quick release in case of emergency
- Reimbursement Code A7526

DIMENSIONS

Length: 22" / Width: 1"
